Projects

1. Central Bank Reporting Management (CBRM) – Spectrum Engineering Consortium Ltd.

Objective: Regulatory reporting application for **Standard Chartered** | Bangladesh. This sophisticated regulatory and **Bangladesh bank** reporting application within the banking domain seamlessly extracts, transforms, and loads data from core banking systems and other relevant sources. Its primary objective is to meticulously process data to generate critical reports such as CIB, CL, ED, etc., essential for submission to Bangladesh Bank. Additionally, the system caters to the diverse analytical needs of management by generating a spectrum of related reports.

Technologies: Java 8, Spring framework, MSSQL Server.

2. Merchant Loan Service – ShurjoMukhi Limited

Objective: The loan automation system is utilized to obtain loans from **Bangladesh Finance** for ShurjoPay Merchants.

Technologies: Java 17, Spring 5, Spring-boot 3, MySQL, Junit 5, JPA-Hibernate, BD Finance's APIs integration.

3. Chittagong University Payment Service – ShurjoMukhi Limited

Objective: Different portal / service to serve ShurjoPay payment services for all students and staffs.

Technologies: Java 17, Spring 5, Spring-boot 3, PostgreSQL, Junit 5, java mail service.

4. Cash Incentive Management System – Freelance

Objective: Developed Cash Incentive Management System for **Hussain Farhad & Co.** | Chartered Accountants to streamline financial processes.

Key Contributions:

- Designed and implemented a system to efficiently manage User, Client, Certificate, Bill, and Invoice data.
- Automated the generation of Certificates, Bills, and Invoices for banks and clients.
- Integrated User Role Management for secure access control.
- Developed Stored Procedures to optimize database operations and improve system performance.
- Enhanced operational efficiency by digitizing and optimizing incentive-related workflows.

Technologies: Java 17, Spring 5, Spring-boot 3, MySQL and JPA-Hibernate.

URL: <http://43.225.151.41:5000>

5. e-Visa Service – Freelance

Objective: Find and download e-visas and manual visas for Kuwait based on passport number, date of birth, and nationality. Knowing the status of a visa, generating a QR code after scanning it, redirecting to the status page, and managing them are just some of the features.

Technologies: Java 17, Spring 5, Spring-boot 3, MySQL, Angular, SCSS, HTML5, QR Code Styling.

URL: <https://eservices-visacheck-kw.online>

7. ShurjoPay-Plugin for Java & Spring(2 plugins) – ShurjoMukhi Limited

Objective: Developed java and spring library to integrate as pom/gradle dependency and uploaded to maven central repository.

Technologies: Java 8, Spring-boot, Maven central, Nexus server, selenium for test automation.

8. Address Service (apols) – ShurjoMukhi Limited

Objective: Getting english and bangla address by postcode, upazilla, district etc. Goal is to get accurate data from one space

Technologies: Java 17, Spring 5, Spring-boot 3, MongoDB, Junit 5.

9. nid Service (Shurjo-nid) – ShurjoMukhi Limited

Objective: Fetch nid data from Porichoy. Reformat personal information and organize, resolve address information as per regular address object.

Technologies: Java 17, Spring 5, Spring-boot 3, MongoDB, Junit 5, JPA-Hibernate.

10. e-commerce Web application – IsDB-BISEW

Objective: A web application that is fully functional. The features include adding to cart, adding a coupon code, searching for products, multi-vendor, email service, and controlling everything through the Admin panel.

Technologies: Java - 17, Spring-5, Spring-boot-3, Lombok, MySQL Data-Jpa, Spring-boot-starter-mail, Angular, Typescript, CSS3, HTML5.
